Art Unit: 1632

DETAILED ACTION

This application filed November 19, 1996, is a divisional of 08/311,157 filed September 23, 1994, now US Patent 5,871,986.

Claims 1, 27-36 are pending.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970);and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1, 27-36 rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1 of U.S. Patent No. 5,731,182 for the reasons of record as set forth in the office action mailed December 29, 2000 is withdrawn.

The terminal disclaimer filed November 21, 2005 has been accepted.

Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

The remaining rejection of record has been obviated by the filing of the terminal disclaimer. The claims are free of the art of record because the use of a baculovirus vector in a mammalian cell was not taught. Though baculovirus vectors were known at the time of filing, there use was limited to use in insect cells. At the time of filing there was no specific motivation or expectation that vectors used to express a gene of interest in insect cells could be used in mammalian cells as instantly claimed. In addition to the evidence provided in the instant application, the post filing art has demonstrated the successful use of baculovirus vectors in a variety of specific methods including gene therapy protocols in mammals (see for example US Patent 6,183,752-claims 2, 12, 13 and 14).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Joseph Woitach whose telephone number is (571) 272-0739.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ram Shukla, can be reached at (571) 272-0735.

Any inquiry of a general nature or relating to the status of this application should be directed to the Group analyst Dianiece Jacobs whose telephone number is (571) 272-0532.
